EDUCATION

Wayne State University College of Engineering *Detroit, Michigan*
BS. Computer Science GPA: 3.72 | Major GPA: 3.85 *Sep. 2020 – Dec. 2024*

EXPERIENCE

Lady Jane's Haircuts for Men *Jan.* 2026 *– Current*
IT Manager

- Manage IT infrastructure across **100+ salon locations**, ensuring network reliability, system availability, and continuous business operations
- Administer Cradlepoint LTE routers through NetCloud Manager, monitoring connectivity, device health, network performance, and system alerts
- Coordinate with **ISPs and technology vendors** to troubleshoot service disruptions, manage network deployments, and implement infrastructure upgrades
- Support and maintain critical business technology, including VoIP systems, network switches, POS terminals, and end-user devices
- Administer **Google Workspace**, overseeing user provisioning, access management, authentication, and account security
- Provide Tier 1–2 technical support, resolving complex hardware, software, and connectivity issues across multiple locations
- Maintain and enhance corporate websites through front-end development, content management, and technical troubleshooting

National Security Innovation Network *Aug. 2024 – Jan.* 2025
Student Intern

- Developed an android application prototype on a team that converts unstructured voice and text input into structured data
- Implemented front-end features and improved usability for message input, display, and navigation
- Enhanced performance by optimizing message handling and reducing processing delays for large inputs
- Assisted in implementing a structured data model to improve the accuracy and consistency of processed voice and text inputs
- Collaborated with team members to define system architecture, data models, and feature requirements
- Tested application functionality and resolved bugs to improve reliability and performance
- Documented system design, use cases, and implementation details for future development

My Virtual Academy *Nov.* 2021 *– Jan. 2026*
Administrative Assistant

- Answered incoming calls, greeted visitors, and managed outgoing emails while providing professional and timely communication support

NOTABLE PROJECT

Common Operating Picture Completer

- Created an AI/ML-powered system on **Android Studio** transforming unstructured voice and text inputs into structured military reports, enhancing operational efficiency.
- Leveraged a **multi-agent system** to enable seamless communication between machine learning models, including an **Urgency Model**, **Sentiment Model**, and **Entity Extraction Model**
- Designed and deployed an Android application with features such as voice input processing, geolocation logging, biometric authentication, and masked message display toggling

TECHNICAL SKILLS

Tools & Software: NetCloud Manager, GitHub, VSCode, Intellij, Microsoft Suites, Linux, Android Studio
Soft Skills: Problem-solving, critical thinking, collaboration, attention to detail, adaptability, time management
